Applying to a Computer Science or Information Systems Major
Applying to the Computing Sciences Minor

Since University rules state that "A student must complete the major requirements in effect when the student is admitted to the major", it is always wise to complete your major/minor application sooner rather than later in your SPU career. Once you have met the minimum requirements for such acceptance, our advice is “apply NOW”.

Among the “perks” are annual (not class by class) printing privileges and off-hours access to OMH, including the open computer lab, and use of the Computer Science Project room.

Admission to the Major
Admission to a major in computer science or information systems requires:

- A minimum SPU cumulative GPA of 2.0 (C).
- A GPA of 2.5 or above in 10 credits of CSC-labeled courses taken at SPU that apply to the chosen major.

Students are encouraged to apply for their major as soon as they are eligible. An application form is available at [www.spu.edu/depts/csc](http://www.spu.edu/depts/csc).

Admission to the Minor
Admission to a minor in computer science requires:

- A minimum SPU cumulative GPA of 2.0
- A GPA of 2.0 or above in 10 credits of CSC-labeled courses taken at SPU that apply to the minor.

Students are encouraged to apply for their minor as soon as they are eligible. An application form is available at [www.spu.edu/depts/csc](http://www.spu.edu/depts/csc).

Whether it be an app to the major or minor, return the completed form – and a Banner-printed transcript – to your advisor (Tindall or Weltz). We’ll take it from there!
