SquadUp is an app to make organizing sports activities easier by putting all the information that you need in one place. The app will allow you to connect with friends and organize activities such as pickup games by providing the ability to see how many people are scheduled at a location, and the ability to invite others.

The motive behind this app is to reduce the amount of time wasted while trying to set up sporting activities.

SquadUp is currently being developed to help organize playing basketball but we plan on including other sports and activities in the future. We also plan on expanding to other platforms such as iOS and Windows.

### Current Issues
- Unorganized
- No guarantee that there will be people to play with when you arrive
- No guarantee of open gym when you arrive
- Can’t easily invite friends to play with
- Can’t see where other players are playing that night

### System Overview
SquadUp is an app to make organizing sports activities easier by putting all the information that you need in one place. The app will allow you to connect with friends and organize activities such as pickup games by providing the ability to see how many people are scheduled at a location, and the ability to invite others.

### Motive
The motive behind this app is to reduce the amount of time wasted while trying to set up sporting activities.

### Future Plans
SquadUp is currently being developed to help organize playing basketball but we plan on including other sports and activities in the future. We also plan on expanding to other platforms such as iOS and Windows.

### Usage
- Create an account in two easy steps
- View and add other local athlete profiles as friends
- Browse for available local gyms and view their schedules
- Browse your friends schedules
- Invite your friends to join you while you are at the gym
