

Edward Bauman Electrical Engineering Excellence Scholarship

For electrical engineering majors entering their senior year

Seattle Pacific University awards an Edward Bauman Engineering Excellence Scholarship to a student entering their senior year as an electrical engineering major. The scholarship is awarded to a student who on the basis of character, scholarship, and potential, has been recognized as the premier Electrical Engineering student; such recipients will be known as Edward Bauman Scholars.

Requirements

Edward Bauman Scholars must be full-time students majoring in electrical engineering at SPU. Eligibility to apply for this scholarship is limited to students who are completing their junior year of study in electrical engineering at SPU – students who are planning to enroll in engineering senior design next year. The funds will be divided into three equal payments to be made to the student's SPU account during Autumn, Winter and Spring quarters of the senior year as long as the recipient remains in good academic standing and makes sufficient progress towards graduation as an electrical engineering major.

Application Process

Deadline: March 12

Complete the items listed below.

1. Engineering scholarship application form (next page).
2. Write a 300-500 word essay, as described below.
3. Include an unofficial transcript.

Return the completed application form by the deadline to Kevin Bolding.

Essay (300-500 words): Discuss how you see yourself fulfilling God's plans in your life through the study and practice of engineering. Why do you study engineering? What do you hope to achieve in the future through engineering? Give some examples of experiences you've had that excite you about your future as an engineer. Explain how you participate in activities that prepare you to be a servant-leader. Describe some examples of your personal growth in the last year. Let us know as much as possible about how you envision yourself becoming an excellent engineer in the service of God.

Notification

Engineering scholarship recipients will be announced at the Engineering Senior Design Final Presentations in June.
